14 NOV 1965

MEMORANDUM FOR: Director of Logistics

SUBJECT : Electrical Power for Agency Headquarters Facilities

1. Please conduct a current study on the availability of instantaneous supplementary electrical power for critical Agency facilities in the event of a power failure by the Virginia Electric and Power Company. The study should also include the availability of supplementary power facilities to maintain continuous operation of Headquarters building activities on a reduced scale during a lengthy power failure.

2. I am particularly concerned about the availability of instantaneous supplementary power for the OGI Operations Center, the Signal Center, the telephone system, and similar critical facilities which must be kept in continuous operation. Your report should also contain recommendations for any additional actions necessary to ensure continuity of these activities.

3. I should like to receive the report by 30 November or sooner if possible.

Signed

R. L. Bannerman
Deputy Director
for Support
